I was rather surprised that there was an upcoming Hello Kitty game whilst surfing the "upcoming releases" section. This game is very simple but yet very fun.

You can do single races and tournaments worth of 4 races each, variety of quests, characters and options for costumes/accessories for them which is very cute. As you proceed in the game, the more you unlock. Great thing about this game is that you can play up to 4 players but with those in front of your screen. So far, this game overall is wonderful and is a must get for those who love racing games like Mario Kart or Sonic Transformed, Hello Kitty fans or those who just like anything cute :3

Hopefully the game gets more content and updates in the future as it would be nice if there was an online mode, story mode, maybe a CG Gallery worth of images to unlock too, trading cards/emoticons for the Steam Market and possibly a save button since I don't think there is one.. xD

Overall, I really like the game the way it is right now and for a first day release, I am amazed that there are barely any bugs or issues except that player 2 choosing in multiplayer doesn't seem to work as in... we got the character but no confirm button for player 2 :(oh well :3. Like its predecessor its a god darn fine game with tweaked controls for better puzzle platforming action! and the special levels will keep you on your toes. I LOVE IT DEARLY!. A realistic portrayal of the nightlife of aged japanese salarymen.. this game is really good. love it and i love how it is setup

only thing is the dev needs to add aliens. storms something to keep me playing
once you get off the planet its just not much to really do
other then that i have 46 hours jammed in this game and well have more as i play
keep up the good work.....

p.s dev if you read this please add something to keep us going

aliens storms something i can atk and try and build my base to stay alive not just losing air and a rock falling on my head thats lame. Disclaimer - most of my playtime is on the browser version. But they seem basically the same?

How is this game not a bigger deal? A zillion cards, great art, lots of gameplay I'd never seen before. Making decks is crazy! I have a backlog of 100 things to try. because you can play cards from you whole deck whenever, a lot of the strategy is deckbuilding. it's Johnny paradise. But some of the cards with lots of skills have you making tough choices all game long.

Needs more players. Come on people, encourage more players so I can fight them!

. I would love to see a "special" 2 hand great sword to match the outfit. I really dont care about the stats on it except it should be competetive with Reikland great sword.

Other than that, then the outfit looks cool and the roleplay enhanced even further.. Bon jeux de shoot avec des voiture très fun! a essayer. Buy this game, FOOOOOOOOOOOOOR FREEDOM. Actually get the pack.

Do a drinking game:

- 1 drink any hero says their catch phrase
- 2 if the phrase is "FORRRR FREEDOM"
- 3 upon death

Add your own as you play the game!. Absolutely Amazing.. I did not use this game to farm trading cards.

quot; Тихоокеанский рубеж " только без Кайдзю. Геймплей веселый.. The spin-off continuation of Heroes Rise series from COG arrives!!! Heroes is a trilogy is this is made off the best part of the trilogy, Hero Project, a super hero reality show. Obviously comparison will be made regardless of necessity. So between first Hero Project and Redemption, I choose first because it was way refreshing sequel to the first part. But between the first trilogy and Redemption, I choose this because the stats are way better refined and it is not hard to grasp.

Story is good and intriguing especially temptations to change side. If it materializes, it would be good. I did like the dynamic with sick jelly sibling. Obviously sequels are being set up but somehow the story seems more linear than the trilogy which seems unsettling, hopefully I am wrong. Also when MC connects the dot about what a certain psychic told to do and the reason behind it, seems a like a plot hole big as The Falls itself. I could have missed something but when I read it, I was stumped and clueless how the MC made head and toes of something like that. Plus no further explanation made, bugs me more.

Talking about bugs, first I could not transfer my Hero Fall saves to Redemption. I had to play through again which was annoying. What was more annoying is the fact I bought my warning DLC yet unable to use cause of bug. Yet I did achieve my best first playthrough because Zach like readers be themselves which I have mastered.

8/10 Not the Redemption the fans eager for yet future redemptions could be, hopefully.

. Side story for SD. Also worth having imho.. Doesn't seem to have a ton of replayability but got 9 hours out of it first session, fairly easy to learn.

A major complaint tho, when attacking it seems you can just place a row of 12 Artillery pieces blow theirs up and have them sit on the defensive not willing to walk forward to harm you, essentially granting you free kills.

Enjoyed my time with it might re-visit, too expensive tho, but if you get in the spirit like i did totally worth it, was mad when the game refused to let me go on so reloaded and sabotaged my own playthrough just so i could get to defeat all the powers before having the game declare victory for me.. I'd say buy this ONLY IF NEEDED! The items are extremely op and should be used for post game or what I did and use them only when I didn't feel like grinding. Other than that I stuck to regular items. You need to unequip them from the characters every time you get them though. The accessories like the Umio face mask are funny though. Fallen Neptune is my favourite because it's just a tiny Nep that fell into someone's head. You can only see her waist and below plus that bit a fanservice which her you know whats are showing at the proper camera angle.. No one really plays this anymore.. Scary n Awesome
