This is a great Halloween game, and super cute (especially the ending and the extra). Started the game and there was no tutorial on what to do, had to figure out what each panel was showing and how to mine, the game took barely 1 hour to get all the achievements.

would I recommend this game? Yes, it was 1\$ and helped me kill 1 hour of my time which is why I play clicker games. 10/10. Its not amazing, the AI isnt good, but it works. Purchased the game on release day having read no reviews, and it works, it didnt crash, nothing game breaking appeared.

Having purchased too many "early access" or beta releases of games that never get "finished" and in reality were just s..t its nice to buy a game and it appear to have been bug tested to some extent. Dont buy this game thinking your getting a time sink because youll get bored at some point by its simplicity and ease to win, But for around a tenner its not hard to get 10-20 hours of play out of and enjoy,. Absolutely love it, love the art-style. the controls are tight, jump is on key-down and not key-up (so many games muck this up). The game is endearing, it grabs you right from the start.

The game play keeps varying, plenty of different enemies. Nice little cut-scenes. And for the price it doesn't have to be long, I think it's a steal.

I'm surprised this game has negative reviews, this is one of the best platformers I've played for a long time.

You will die a lot, this is balanced out by there being regular check points, when you die, you don't go back far. A small criticism is that there are many leaps of faith, but that's just the style of the game, you run, die and you learn how not to die.. I love everything about this VN. The story is really well written that I couldn't stop reading. What really caught my eye was each route was different. Nothing was completely the same. Each route had a conflict and the MC had hers. She felt like a real human. How most people would react, not blow it off like it was nothing. I like how the characters interacted with each other. It felt real as well. The art style was unique to the story that was showing. I know I will be re-reading this in the future! Thank you for making such a wonderful game!. Absolutely love this game! I just bought this game for recording it, and absolutely do I love it.

They have so many different aspects as well as grinding, etc...

Plus, who doesn't love a game that gives you a challenge?

For my thoughts of this game: (with gameplay)

<https://youtu.be/JQbLmCsWyoI>. This games gets no updates and it has crap to do.. How can I start this map? I downloaded and installed it, but it won't appear in my "new game" menu.

. This is My top Favorite Suit over all the other suits in both Strike Suit Infinity and Strike Suit Zero. The Raptor is the quickest of the prototype ships, at the expense of armour. Its speed and maneuverability makes it a formidable opponent in a dogfight. Combine this with a powerful short-range shotgun weapon - making it lethal in close-quarters - and it's not surprising the raptor is the Suit of choice for many pilots. It also my choice because the suit's original color in Strike Suit Infinity is purple and I always look foward to having the ability to fly at the top of the top High-speeds when it comes to moving from point A to Point B ASAP. The Cons about Raptor is it's armour is very week, you're likely to die very quickly relying on this suit's armour to protect you from the incoming cannon fire. Also you cannot use this Strike Suit during your first time playing through a missions. You are able to use it after copleating the first mission, I sugguset playing through all the missions first, then playing any of missions again using Raptor.. Well, brings back good memories!

Great game, 3D CRAZY mode is fantastic.

150 levels, less than 2 euros, this puzzle game is not easy at all. Maybe it is me who is bad at playing Neon Warp or maybe this game is done for people who are more intelligent than me.

What you have to do ? It is to color all the tiles from the game in one color (the one shown at the beginning of the level). It sounds pretty easy but it is not because when you change a square, another or some other ones are having a new color too.

The solution is probably to read the rules.

. Saw I had a rare achieve for unlocking 30+ characters in this game back in 2012.

Must have unlocked Gandalf cause I have no memory of this game.

Neat.. I enjoyet Dynamite Jack far more than I expected too. It was well polished, well balanced and most importantly enjoyable. Great to see an action game that isn't a shooter too.. Worth the price.

I'd definitely recommend this game to people who are found of mysteries, witches and pretty games! The characters are adorable and well-defined and the puzzles are clever and original.

While entirely different from Trick & Treat, I was happy to find out more about Charlotte and Marilyn as well as the world they are part of. I was also pleasantly surprised by how much the dev(s) has grown since their first game. A few typos here and there, but nothing big enough to create a linguistic barrer.. I'm glad i got a 90% off coupon from leveling up. its fun loser. Absolutely Amazing Zoo Simulation/tycoon definatly better than ZT2. Very good for my kid. Calm gaming not attacking for brainshare.
